

# Creative Commons Licences

## What are Creative Commons Licences?

Creative Commons (CC) is a type of Open Licence dedicated to sharing knowledge and creativity, globally. It allows authors to set and control terms to their work and how it is used by others.

- There are 6 main licences with different terms and conditions. They are considered the “most free” (**CC-BY**) to the “least free” (**CC-BY-NC-ND**)
- All of the licences require Attribution (BY).
- CC licences can be placed on any type of work - however we recommend using an equivalent licence for computer software or hardware.

Each licence and their terms is explored below, with full information available on [Creative Commons website](https://creativecommons.org/).

## Why use a Creative Commons Licence?

- CC licences both promote and protect an author’s creativity, ensuring attribution in all uses of an original work, and in some cases an adapted work.
- The licences build confidence and compliancy of users of a work, allowing them to understand what can be done with material.
- CC licences are a requirement of most Open Access work – in this context work can be accessed freely while authors control terms and retain some (or in some cases, all) copyright.\*

*\*Some research articles have transfer agreements with publishers. However on most occasions authors can choose a particular Creative Commons licence.*

## YSJU Open Access Policy and Creative Commons Licences

- Depending on the publishing route, authors may be required to select a Creative Commons licence for research articles.
- YSJU **strongly recommends** selecting the CC-BY or CC-BY-ND licence for research articles. This is to ensure eligibility for REF and to align with Open Access policies within Higher Education.
- If a Creative Commons isn’t selected, it often defaults to a licence set by the publisher - it’s important to be aware of any licence sections on submission points.

If you wish to select a different Creative Commons Attribution licence, please contact RaY before proceeding at [ray@yorks.ac.uk](mailto:ray@yorks.ac.uk).

Attribution  
CC BY

This licence applies to both commercial and non-commercial use.

As an **creator** of a work, the CC BY licence allows your work to:

- Be shared by others
- Be adapted, remix and built on by others
- Be credited as the original creator in every use or adaptation of the work.

As a **user** of a CC BY licenced work you can:

- Share and distribute the work without prior permission.
- Adapt and build upon the work as long as the original creator is credited.

Attribution ShareAlike  
CC BY-SA

All use or adaptations of a CC BY-SA licensed work must be credited under **identical terms** of the original work. This licence applies to both commercial and non-commercial use.

As an **creator** of a work, the CC BY-SA licence allows your work to:

- Be shared by others
- Be adapted, remixed and built on by others
- Be created as the original creator in every use of the work.
- The creator controls the licence terms of any future adaptations.

As a **user** of a CC BY-SA licensed work you can:

- Share and distribute the work without prior permission.
- Adapt, revise the work and create new derivations **as long as all derivations are clearly states (with links to the original) and licensed under identical licence terms as the original creation.**

Attribution NoDerivs  
CC BY-ND

**No Derivations** - any adaptations from a CC BY-ND work is for **personal use only and cannot be shared.**

The licence applies to both commercial and non-commercial use.

As an **creator** of a work, the CC BY-ND licence allows your work to:

- Be shared by others in it's original form.
- Be credited as the original creator in every use of the work.

As a **user** of a CC BY-ND licenced work you can:

- Share and distribute the original work without prior permission.
- Adapt and build upon the original work for **personal use only**—only the original work can be shared and the original creation and its creator is credited.

## Attribution NonCommercial CC BY-NC

CC BY-NC licensed works are exclusively for **non-commercial use**.

As an **creator** of a work, the CC BY-NC licence allows your work to:

- Be shared by others
- Adapted, remix and built on by others for non-commercial purposes.
- Be credited as the original creator in every use or adaptation of the work.

As a **user** of a CC BY-NC licenced work you can:

- Share and distribute the work without prior permission.
- Adapt and build upon the work **as long as the original creation and it's creator is credited.**
- Share, publish and licence new derivatives under your own terms.

## Attribution NonCommercial ShareAlike CC BY-NC-SA

All use or adaptations of work must be credited under **identical terms** of the original work. The licence applies exclusively to **non-commercial use**.

As an **creator** of a work, the CC BY-NC-SA licence allows your work to:

- Be shared by others for non-commercial purposes
- Adapted, remix and built on by others for non-commercial purposes
- Control the licence terms of any adaptations.

As a **user** of a CC BY-NC-SA licenced work you can:

- Share and distribute the work without prior permission for **non commercial purposes only.**
- Adapt, revise the work and create new, non commercial derivations **as long as all derivations are clearly stated (with links to the original) and licensed under identical licence terms as the original creation.**

## Attribution NonCommercial NoDerivs CC BY-NC-ND

**No Derivations** - any adaptations from a CC BY-NC-ND work is for **personal use only and cannot be shared**.

Works can be accessed and distributed but they cannot be changed in anyway. The licence applies exclusively to **non-commercial use**.

As an **creator** of a work, the CC BY-NC-ND licence allows your work to:

- Be shared by others on a non-commercial basis
- Be credited as the original creator in every use of the work.

As a user of a CC BY-NC-ND licenced work you can:

- Share and distribute the work without prior permission, for non-commercial purposes only.
- **Use the work in it's original form only.**
